

Don't forget...

SKC offers regularly held ONE day practical training courses in air monitoring.

The course is suitable for beginners through to those wanting a refresher. It can be tailored and run in-house and is a mixture of theory and practical sessions.

The course includes:

- Introduction to air sampling methods
- Exposure limits – what they are and how to monitor for them
- Dust/gas/vapour sampling - how, when and why – the recognised methods
- Practical sampling exercises with equipment.

For dates and more information, please contact SKC.

Flite 3

Flite 3

Portable, versatile and fully programmable pump for high volume air sampling. SKC's highly versatile Flite 3 air sample pump provides portable high performance sampling for dusts, aerosols, fibres and microbes. Flite 3 is ideal for static asbestos sampling.

Any building constructed pre 2000 could contain asbestos. When asbestos is disturbed the fibres can be inhaled into the lungs and can cause asbestosis, lung cancer and a particularly aggressive cancer called Mesothelioma.

These diseases cause 4000 deaths a year. Static sampling is necessary when going through the asbestos removing process and when assessing a site for reoccupation.

The SKC Flite 3 is suitable for a range of applications including:

- Asbestos monitoring
- Area and environmental monitoring
- Biosampling
- Long-term background monitoring

Features Include:

- Fully portable with light weight battery option
- Wide flow range – 2 L/min to 20 L/min to free air
- Fully programmable, can be set to manual, timed, delayed or intermittent sampling
- Long run times, up to 24 hours depending on the filter and flow rate
- High performance sampling capabilities
- Battery, 2 models available, suitable for either longer run times or light weight operation
- Steel casing to withstand daily rigours and a sturdy handle for easy portability
- Optional sampling mast – lightweight, screw-in 2 piece aluminium alloy tube
- Ensures minimum 1 metre sampling height with the cowled asbestos head
- Front mounted power socket to provide easy access if mains operated

**For further information please contact SKC on 01258 480188

Pumps and Kits:

Flite 3 Pump battery not included	901-3011
Flite 3 Pump Kit with lightweight battery and charger	901-3011-3K
Flite 3 Pump Kit with long run time battery and charger	901-3011-7K

Power Options:

3.2 Ah, light weight battery	P901301
7 Ah, longer run times battery	P901302
Battery Charger (UK/EU/US/AUS mains plug)	901-310
Mains Adaptor (UK/EU/US/AUS mains plug)	901-311

Accessories:

Aluminium Sampling Mast	901-213
Asbestos Sampling Head 25 mm, with aluminium cowl	225-54A
MCE Gridded Filters 25 mm 0.8 µm (Pk/100)	225-1913
Acetone Vaporiser	714C

Calibration:

Rotameter	393-2260
2.0 L/min to 26 L/min	
Calidaptor	391-05
For asbestos sample heads
